CoRE A 301

Abstract

AWS provides global technical support to a wide range of external customers as they build mission-critical applications on top of AWS cloud services. As a member of the AWS team you will be at the forefront of this transformational technology assisting a global list of companies that are taking advantage of a growing set of services and features to run their big data applications. You will work with leading companies in this space and directly with the engineering teams within Amazon developing these new services like Dynamo DB, Hadoop, ElasticSearch, Spark, Presto etc.

Please note: Light refreshments will be served and Speakers will be collecting resumes.

Organizer(s): James Abello
