

Poster Session

Sunday, September 21, 2008

SASyLF: An Educational Proof Assistant for Language Theory	2
<i>Jonathan Aldrich, Robert J. Simmons and Key Shin</i>	
A Type System for Certified Garbage Collection of Haskell Programs	4
<i>Tim Chevalier and Andrew Tolmach</i>	
TreeView: Interactive Large Tree Visualization in Haskell	6
<i>Jefferson Heard and Xiaojun Guan</i>	
An ML-Like Universal Module System	8
<i>Hyeonseung Im and Sungwoo Park</i>	
Directing JavaScript with Arrows	10
<i>Khoo Yit Phang, Michael Hicks, Jeffrey S. Foster and Vibha Sazawal</i>	
Monadic Programming Through Program Extraction	12
<i>Josef Pohl</i>	
Unified Type Checking for Type Classes and Type Families	14
<i>Tom Schrijvers and Martin Sulzmann</i>	
Normalization in the Dual Calculus with Sigma Reductions	16
<i>Jeffrey Vaughan, Steve Zdancewic and Stephanie Weirich</i>	
Translucent Abstraction—Algebraic Datatypes with Safe Views	18
<i>Meng Wang and Jeremy Gibbons</i>	
Schema Mapping Polymorphism	20
<i>Ryan Wisnesky</i>	

Program committee: Benjamin Pierce (University of Pennsylvania)
Colin Runciman (University of York)
Chung-chieh Shan (Rutgers University)
