mSpy Can Do It All

The Best Way to Monitor Your Cell Phone or Tablet

mSpy is the most popular and user-friendly application for watching over your kids, preventing theft, and supervising your employees’ performance. Our mobile monitoring software runs on the target device to track all activity including call log history, GPS location, calendar updates, text messages, emails, web history, and much more! After following our easy, step by step instructions on how to create your own personal online mSpy account, you may log in to immediately begin viewing the tracked data.

Manage Calls

mSpy allows you to view all incoming/outgoing calls with their duration and timestamp.

- Call history & Contact List
- Incoming Call Blocking

Track text messages

This cell phone tracking software lets you read all text and multimedia messages sent or received by the target phone user.

- Text Messages, MMS
Read emails

With this mobile tracking application, you can make sure your employees' time is not wasted on writing personal emails, and your children are not threatened by online predators.

- Incoming / Outgoing Emails

Track GPS Location

mSpy can be set up to track GPS location of your target phone. Get to know if your son is where he is supposed to be or if your employee is really in a traffic jam.

- Current GPS Location
- Geo-Fencing

Monitor Internet Use

View all URLs visited by the user in cell phone browser. Check what they're up to online by scanning through their browsing history.

- Website History
- Bookmarks
- Blocking Websites
- Wi-Fi Networks
- Keyword alerts
Access Calendar and Address Book

Check every contact entered into the phone address book and keep track of every event in the phone's calendar.

- Calendar, Notes, Tasks
- Contacts

Read Instant Messages

Use this feature to capture messages sent and received by the target user on Skype, WhatsApp, iMessage, and Viber. Supervise user's popular social network accounts to learn what they texting about.

- Skype
- WhatsApp
- iMessage (iOS)
- Facebook Messenger
- Snapchat
- LINE
- Telegram
- Tinder
- Viber

Control Apps and Programs

Determine what apps and programs the target phone can access. Make sure no inappropriate activity is going on.

- installed Applications
- Application blocking
- Keylogger
**View Multimedia Files**

This mobile surveillance software enables you to see any photos and videos that have been saved on the target phone. Every time your child or employee records a video or takes a photo with their camera phone, it will be immediately uploaded to your mSpy account.

- Photos
- Videos
- Instagram

---

**Remote Control**

With smartphones being often lost or stolen, information theft is getting quite common. By remotely erasing your target phone data or locking the device, you make sure personal data does not fall into the wrong hands.

- Device Wipeout
- Locked Device
- Additional Device Info
- Control Panel

---

**Analyze It**

You can set up this cell phone tracking software to generate detailed reports on the target phone use. Use this feature if you need to control and track many cell phones at once.

- Comprehensive Reports
Feel Supported
